

### MAC MACHINE—LAND LEVELER/INFIELD GROOMER

- 72" Wide grading & rolling path
- Heavy duty welded steel tube frame system
- Adjustable height hitch
- No tools required for any adjustments on machine
- Total weight of base unit is approximately 2100 lbs.
- Complete unit has heavy duty powder coat finish
- Both grader blade and roller are controlled using electric controlled hydraulics
- Needs to be pulled by min. 28HP tractor or 4x4 ATV that is capable of pulling at least 2100 lbs.
- Hydraulics controlled by heavy duty, low voltage aluminum joystick allowing independent adjustment of left and right sides of grader blades ensuring precision accuracy in grading
- Additional hitch attachment area on rear of machine for optional accessories
- **Although pneumatic tires are road rated, they are intended to be used in low speed applications between fields.**
- **Unit is NOT designed to be pulled down the road at normal or high speeds at ANYTIME. Should be trailered when moving long distances.**
